

Features:

*The first fingerprint door lock with MENU instruction on OLED display in the world.

*Easy operation feature enables old people or children to use it without good memory.

* The lock uses high quality Zinc-alloy materials. The surface of the lock uses advanced electroplated and surface treatment technology.

*The fingerprint lock adopted international advanced fingerprint identification modules, imported chips, high-safety identification methods and precise fingerprint identification algorithm.

L3000

Technical Specification:

Sensor: ZK sensor

Core board: ZEM700

Display: OLED

User capacity:

Fingerprint: 500 , password:100, ID number:500

Transaction storage: 30,000

Password length: 6-10

Communication mode: RS232

Power supply: 4-AA alkaline batteries 6.8-3.7V

Identification time: <=1.5 sec

Identification mode: 1:N only

Colors: golden , silver

FRR: ≤1%

FAR: ≤0.0001%

Operation temperature: 0°C--45°C

Operation humanity:20%-80%

Mifare card standard

Multilanguage: English , Spanish,...
