

Fingerprint Car Lock

Product Description

The MG-01 fingerprint car lock system from Covetek is a biometric security system installed inside the car, which does not allow the car to be started without fingerprint verification, even if the correct key is used.

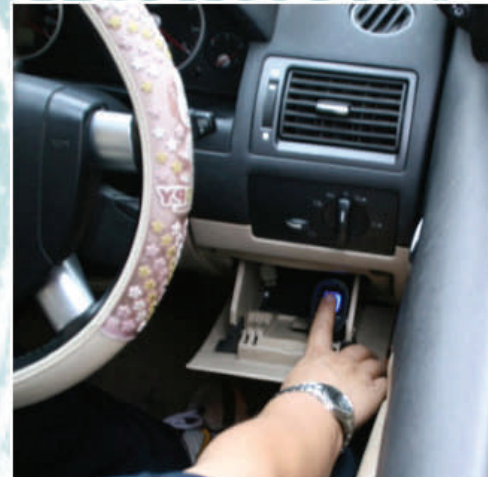

It immobilizes the car in your absence and prevents the car from being used by non-authorized people.

It consists of five parts: fingerprint scanner, controller, backup card, four relays and one siren. The four relays control fuel pump, engine, instrument and siren.

System Features

- **Super Security:** World class fingerprint verification technology, using the latest optical fingerprint sensor.
- **Friendly Operation:** Voice instructions for easy operation.
- **Super Stability:** Adopt automobile bridge-relays to protect the car entire lines from being disturbed. The controller with aluminum alloy case guarantees the stable operation of system.
- **Strong Compatibility:** Compatible with all cars' original security system, without needing to change the car's original device.
- **Strong Adaptability:** Unit works under any environment in the world. It has a wide working temperature of -30°C~80°C and working humidity:40%RH~85%RH (no dew)
- **Rich Application Experiences:** More than three years of successful applications in thousands of cars all over the world. Models include BMW, Ford, Mazda, Toyota, Mercedes and many more. The unit can also be fitted to larger heavy vehicles - trucks, mining, earthmoving equip with enclosed cabins.
- **Backup Card:** Unique backup card for emergency in addition to fingerprint. Convenient for car repairs or maintenance without fingerprint verification.
- **Exact Alarm:** the management controller will not make any sound. Alarm/siren will activate only when unit is illegally disassembled.
